

Ascolta Greenfield: Rapid NIST Compliance in the Cloud

5 Key Facts

Ascolta Greenfield is a secure, fully compliant cloud environment that addresses all 110 NIST controls in a single, easy-to-implement solution. Migrate government contract work and Controlled Unclassified Information (CUI) from the corporate network to a managed, secure, compliant, affordable system that immediately meets compliance requirements.

- 1 Offers a higher level of security than standard public Cloud environments**
 - Cloud Service Providers are responsible for security *of* the cloud; the customer is responsible for security *in* the cloud.
 - Greenfield addresses security controls for your cloud instance, providing a secure and compliant computing and storage environment.
 - Greenfield allows you to achieve NIST Special Publication 800-171 compliance immediately.
- 2 Dashboard simplifies management with real-time metrics and up-to-date security documentation**
 - A “single pane of glass” for system status, usage metrics and reporting for increased visibility.
 - Real-time System Security Plan (SSP) to verify compliance and submit to contract prime.
 - Real-time Plan of Actions and Milestones (POA&M) for non-implemented controls and mitigation plans.
- 3 Provides managed security and continuous monitoring of your environment**
 - Ascolta’s managed Security Operations Center (SOC) protects against security incidents and can assist in remediation efforts.
 - Greenfield instances are continuously monitored for compliance status and security anomalies.
 - Security anomalies are verified by SOC analysts for false positive reduction.
- 4 Allows for rapid provisioning and operational start-up**
 - Standard environments can be quickly created to provide access to a personal, secure and compliant environment with all required documentation in as little as 24 hours.
 - Easy account creation and management with our intuitive dashboard.
 - Migrate data quickly and begin usage in a highly secure and compliant environment.
- 5 Offers multiple environments to fit your needs**
 - Every Ascolta Greenfield pre-configured environment is available with a range of operating systems, number of virtual processors, memory, speed and storage.
 - Ascolta engineers can quickly design, price and build a custom environment when requirements go beyond our off-the-shelf solutions.
 - All environments, including custom deployments, come with a range of security and compliance options to protect your information and business operations.
